Al N.G.T - Al Never Get Tired Whitepaper

Introduction

Al N.G.T (Al Never Get Tired) is a revolutionary blockchain project that bridges the gap between Artificial Intelligence (Al) and decentralized finance (DeFi). By combining cutting-edge technology with sustainable tokenomics, we aim to create a platform that fosters innovation, community engagement, and financial inclusivity.

Mission and Vision

- Mission: To empower individuals through decentralized technology, leveraging AI and blockchain to redefine the future of finance and innovation.
- Vision: To create a sustainable ecosystem where Al-driven tools and blockchain technology enable global collaboration, transparency, and long-term growth.

Tokenomics

- Total Supply: 1 Billion Tokens (1,000,000,000 AI N.G.T)
- Burn Tax: Every transaction burns 2% of its value, creating a deflationary model.
- Random Burn Reward (RBR): 15% of burned tokens are distributed randomly to one lucky holder, promoting long-term holding and engagement.

Token Allocation

- 2.5%: Reserved for Development and Team.
- 2.5%: Dedicated to Marketing.
- 10%: Community Airdrop for early adopters and supporters.
- 85%: Public Sale in 4 phases.

Roadmap

2024: Launch Phase

- Website and Discord launch.
- Token deployment on the blockchain.

2025: Expansion Phase

- Q1: Community building, marketing campaigns, and partnerships.
- Q2: Public sale of remaining tokens and activation of RBR mechanisms.
- Q3: Introduction of staking and liquidity mining.

- Q4: Formation of a Decentralized Autonomous Organization (DAO).

Tranches and RBR Mechanism

- First Tranche: 0.00001 euro/token; RBR threshold: 1,000,000 NGT.
- Second Tranche: 0.0000115 euro/token; RBR threshold: 2,500,000 NGT.
- Third Tranche: 0.00001495 euro/token; RBR threshold: 4,000,000 NGT.
- Fourth Tranche: 0.00002168 euro/token; RBR threshold: 5,500,000 NGT.

Transaction Fees

Buy Tax (3%)

- 1%: for Development and Team.
- 1%: for Burn.
- 1%: for Liquidity.

Sell Tax (6%)

- 1.25%: for Development and Team.
- 1%: for Marketing.
- 1.25%: for Community Rewards.
- 1.25%: for Burn.
- 1.25%: for Liquidity.

Unique Features

- Deflationary Model: Automated burning ensures scarcity over time.
- RBR Mechanism: Encourages holding by randomly rewarding users from burned tokens.
- Whale Blockade: Limits any single wallet from selling more than 5% of the circulating supply within a 15-minute window, reducing the risk of market manipulation.

Disclaimer

Participation in AI N.G.T involves risks inherent to cryptocurrency markets, including potential financial losses. We do not guarantee profits or returns. Conduct your own research (DYOR) and consult professionals before investing.

Conclusion

Al N.G.T is not just a token—it's a movement. By blending Al and blockchain, we are shaping the future of decentralized finance. Join us as we write the next chapter of innovation and collaboration.

How to Buy AI N.G.T Tokens

Set Up a Wallet

- Download and install a compatible Solana wallet (e.g., Phantom, Solflare).
- Secure your seed phrase and never share it with anyone.

Fund Your Wallet

- Purchase Solana (SOL) from an exchange like Binance, Coinbase, or Kraken.
- Transfer SOL to your wallet address.

Connect to a Decentralized Exchange (DEX)

- Visit a Solana-based DEX like Raydium or Orca.
- Connect your wallet by clicking the 'Connect Wallet' button.

Search for AI N.G.T

- Input the smart contract address of Al N.G.T token.
- Ensure you double-check the contract address to avoid scams.

Buy Al N.G.T Tokens

- Select the amount of SOL you want to exchange for AI N.G.T tokens.
- Confirm the transaction in your wallet.

Verify Your Balance

- Once the transaction is completed, you'll see your Al N.G.T tokens in your wallet.
